DANIEL RODRIGUES MELO

Dear Sir/Madame

I am a full stack developer.

I typically write responsive front ends using a combination of HTML5, CSS3, bootstrap, AngularJS, javascript, jQuery (/mobile).

The front-ends / back-ends usually communicate using RESTful web services (WebApi .net) via JSON.

In the .Net world the back ends, I usually write in C# (WebApi, MVC, .Net Core) and MSSQL or Cosmos DB.

In the Open Source world, I typically write the back end in node.js or PHP (connecting to a MySql. databases).

Git is my source control of choice, but I also have been using TFS. I have project deployed at NuGet platform called "Breadcrumb Express".

I am an experienced cloud developer:

Amazon: AWS, S3, EC2, Elastic Beanstalk

Azure: Cloud Service, Web Application, Hub Notification, Search Service (with index files).

General: TFS, Git, PHP, node.js, npm
Mobile: Xamarin.Forms, Azure Notification Hub. Android

I have experience and enjoy mentoring more junior, trainee developers.

I am confident that I will be an asset to this occupation and I welcome the opportunity to discuss this with you. Should you require additional information I can be reached at +1 5195691484 or by email at dmelo.developer@gmail.com.

Sincerely,

Daniel Melo
